Installation, Operation, and Maintenance Manual

ChromaSteam®X

mr.steam | Feel Good Inc.

IMPORTANT SAFETY INFORMATION

READ ME FIRST:

- 1. Read and follow all instructions within this technical manual.
- 2. Heed all warnings, cautions, notices, and important notes.
- 3. Save this technical manual and leave with the homeowner.

ABOUT WARNINGS, CAUTIONS, NOTICES, AND IMPORTANT NOTES:

As you follow the instructions in this technical manual, you will see four types of callouts: **WARNINGS, CAUTIONS, NOTICES**, and **IMPORTANT NOTES.** This blocked information is important for the safe and efficient installation, operation, and maintenance of the ChromaSteamX. These callouts are described as follows:

NARNING Indicates a potentially hazardous situation, which, if not avoided, may result in death or serious injury.

Indicates a potentially hazardous situation, which, if not avoided, may result in minor or moderate injury.

NOTICE Indicates a situation, which, if not avoided, may result in property damage.

IMPORTANT NOTE: Indicates information that is especially relevant to a problem-free installation.

SAFETY INSTRUCTIONS:

To prevent personal injury and/or product damage, please read the following important safety instructions carefully before installing the ChromaSteamX:

- Do not install the ChromaSteamX controller near any heat sources.
- Clearance and minimum distance between the various components of the ChromaSteamX and the surrounding structure are not specified as long as they are sufficient so that the ambient temperature around the apparatus does not exceed 140 °F (60 °C).
- Do not defeat the safety purpose of the polarized and/or grounding type plug. A polarized plug has two blades, with one wider than the other. A grounding type plug has two blades and a third grounding prong. The wide blade or the third prong are provided for your safety. If the provided plug does not fit into your outlet, consult an electrician for replacement of the obsolete outlet.
- Protect the power cords from being walked on or pinched, particularly at plugs, convenience receptacles, and at the point where the cords exit from the apparatus.
- Only use attachments/accessories specified by the manufacturer.
- All servicing to be performed by qualified service personnel. Servicing is required when the ChromaSteamX is damaged in any way, including when the power-supply cord or plug is damaged, liquid is spilled into or objects fall into the controller, the controller is exposed to rain or moisture, the fixture or controller does not operate normally, or the fixture or controller is dropped.
- Do not disassemble or alter the ChromaSteamX fixture or controller in any way.
- Clean the ChromaSteamX fixture and controller with a dry cloth only. Beware of the application of some products commonly used against corrosion (such as WD-40® family products), as some industrial oils can have negative chemical reactions and damage the housing materials of the ChromaSteamX fixture and controller. Any other materials that may come in contact with the ChromaSteamX must be carefully evaluated under end-use conditions for compatibility.

These instructions are for use by qualified service personnel only. To reduce the risk of electric shock, do not perform any servicing, other than that contained in these instructions.

NOTE: All information in this technical manual is based on the latest product information available at the time of publication. MrSteam reserves the right to make changes at any time without notice.

INSTALLER INSTRUCTIONS

General Information

ChromaSteamX Box Contents:

ChromaSteamX Duo Box Contents:

General Installation

Figure 3 shows how the ChromaSteamX fixture and control box interconnect with each other, and with the steam generator and iSteamX.

IMPORTANT NOTES:

- The included ChromaSteamX accessory communication cable and LED power cable are each 30 ft long. Ensure that the ChromaSteamX fixture and control box are located accordingly. Contact MrSteam to purchase optional 60-foot cables.
- ChromaSteamX Duo comes with an additional LED cluster and LED power cabel. The LED power cable plugs into the control box.
- ChromaSteamX only works with iSteamX.

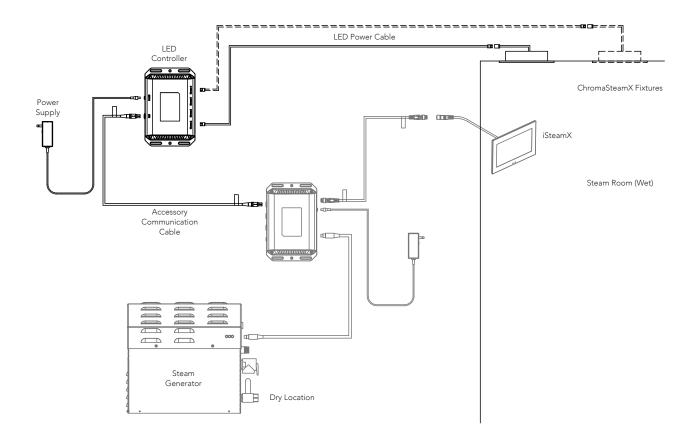

Figure 3

Installing the ChromaSteamX Control Box

Control Box Dimensions

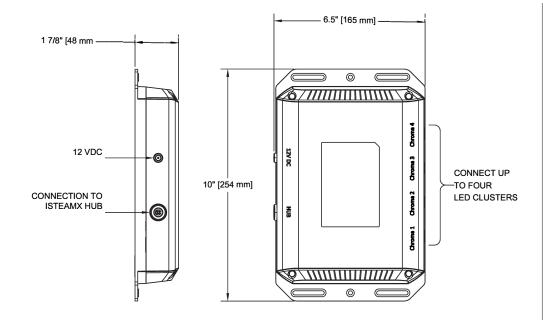

Figure 4

NOTICE

- To prevent product or property damage, do not expose control box to temperatures above 140 °F (60 °C). Do not locate control box in an attic or any location where ambient temperatures may exceed 140 °F (60 °C).
- Do not locate control box next to heat sources, such as hot air registers, air conditioner condensers, etc.
- The control box powers the ChromaSteamX fixture with 5VDC.

Locating the Control Box

Determine the desired location of the ChromaSteamX control box outside the steam room in a dry location.

Shock hazard. Do not place the control box in a location where it can get wet.

IMPORTANT NOTES:

- The included ChromaSteamX accessory communication cable and LED power cab le are each 30 ft long. Ensure that the ChromaSteamX fixture and control box are located accordingly. Contact MrSteam to purchase optional 60-foot cable.
- ChromaSteamX Duo comes with an additional LED cluster and LED power cabel. The LED power cable plugs into the control box.
- ChromaSteamX only works with iSteamX.

Installing the Control Box

Using screws affix the control box to a stable surface (e.g., stud) using the mounting holes on either side of the control box

(Figure 4). The control box can be mounted in any orientation.

NOTICE

- To prevent product or property damage, do not expose control box to temperatures above 140 °F (60 °C). Do not locate control box in an attic or any location where ambient temperatures may exceed 140 °F (60 °C).
- In the event the control box requires servicing, ensure that it is installed in an accessible location.

IMPORTANT NOTE: The following materials (not included) are recommended to install the ChromaSteamX control box:

• Two #10 screws of appropriate length with round, truss, or pan heads.

Installing the ChromaSteamX Fixture

Fixture Dimensions

Figure 5

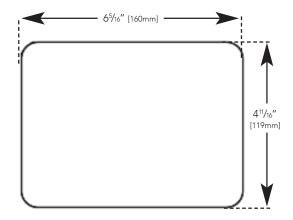

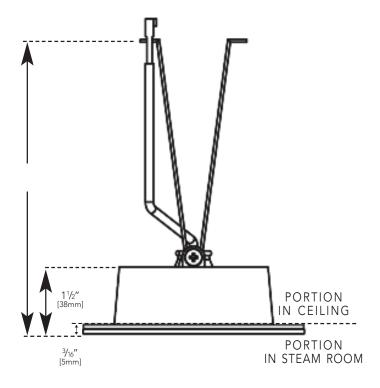

Figure 6

Installing the Junction Box

Functions of the Junction Box:

- **1.** Allows precisely location of the ChromaSteamX fixture within the steam room ceiling.
- **2.** Provides a secure and easily identifiable holder for the control cable while the steam room is being constructed.
- **3.** Works with the ChromaSteamX fixture's retention springs to prevent the fixture from falling and injuring a person in the enclosure.

Locating the Fixture:

- 1. Locate the fixture for optimal lighting within the enclosure.
- **2.** ChromaSteamX is for mood lighting only. Not to be used as a primary lighting source.
- **3.** Do not locate the fixture in direct shower spray, near direct steam emission, or in any location where a lighting fixture may be damaged.

To Install the Junction Box:

- **1.** Remove the two screws from the interior clips of the junction box, and hand-screw them into the wings of the junction box (**Figure 7**).
- **2.** Remove one of the four knockouts from the junction box **(Figure 7)**. the resulting hole will allow routing of the 30-foot LED power cable.
- **3.** Locate the two tabs on the junction box, and line them up against a ceiling joist. The tabs locate the junction box slightly raised from the joist. Screw the two screws into the ceiling joist to secure the junction box (**Figure 8**).
- **4.** Route one end of the 30-foot LED power cable through the knockout into the junction box, and fasten it to one of the interior clips to hold it in place (**Figure 9**). Note that both ends of the 30-foot LED power cable are the same.

IMPORTANT NOTE: Contact MrSteam to purchase an optional 60-foot cable (Part No. 104268-60).

NOTICE

- Be careful not to strain, staple, pinch, or otherwise damage the cable
- Route cable as required to permit replacement.
- Cable should be run in dedicated conduit to facilitate installation, service, and replacement.
- To prevent damage to the cable, do not route cable close to hot water, steam piping, or any heat source.
- **5.** After the junction box is completely installed, ensure that you create an opening in the steam room ceiling that aligns with the junction box (**Figure 10**).

! WARNING

- Installation to be performed by a qualified and licensed electrician.
- **Shock Hazard.** Ensure that power is turned off during installation. Turn off power at breaker panel.

CAUTION

Failure to use the junction box with correctly installed retention springs may result in the ChromaSteamX fixture falling and causing injury.

NOTICE

- To prevent leaks, do not install the ChromaSteamX fixture where direct contact with steam emission or water spray could occur.
- The ChromaSteamX fixture is not intended to be installed underwater.
 To prevent leaks, do not install the ChromaSteamX fixture in a location where it could become submerged.
- The ChromaSteamX fixture is not rated for insulation contact.
 Insulation must be a minimum of 3" away from all sides of the ChromaSteamX fixture assembly to prevent damage to the fixture.

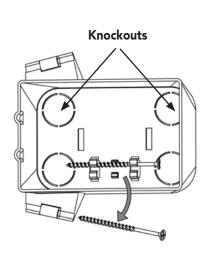

Figure 7

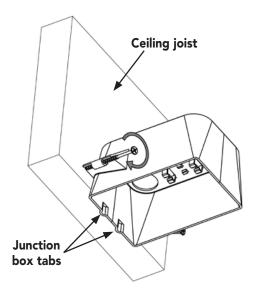

Figure 8

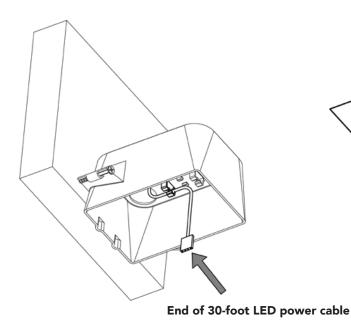

Figure 9

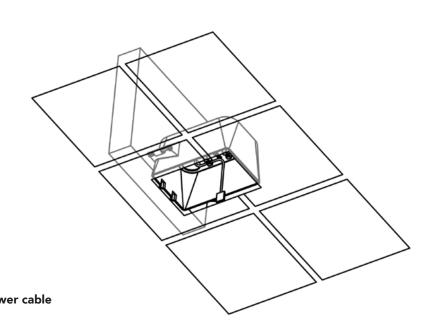

Figure 10

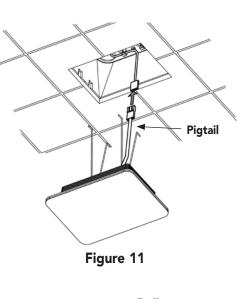

Installing the Fixture

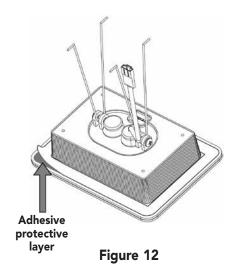

To Install the Fixture:

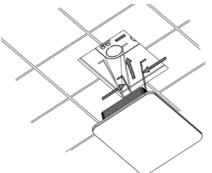

1.Connect the ChromaSteamX fixture's pigtail to the 30-foot LED power cable in the junction box (**Figure 11**).

IMPORTANT NOTE: Test that the fixture operates correctly prior to continuing with the following steps.

- **2.** Clean the surface of the ceiling to ensure the double-stick adhesive of the fixture bonds completely to the ceiling.
- 3. Peel off and discard the protective layer from the fixture's double-stick adhesive (Figure 12).
- **4.** Squeeze the retention springs on the back of the fixture and fit them into the junction box (**Figure 13**). Insert the fixture into the junction box and affix it to the ceiling, being careful not to pinch the pigtail/LED power cable (note that the pigtail/control LED power cable is not shown in **Figure 13**. Press firmly around edges of the fixture to ensure adhesion to ceiling.
- **5.** Apply a bead of silicone around the perimeter of the fixture (**Figure 14**) as required to create a moisture seal between the fixture and the steam room ceiling. Use tape or other means as required to keep the fixture in position as the silicone cures, for 24 hours.

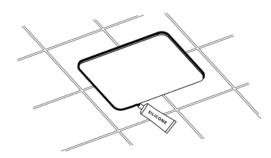

Figure 13

Figure 14

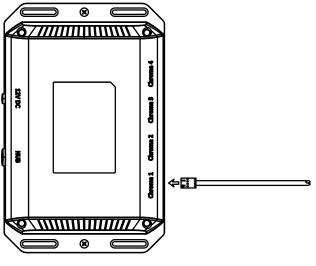

Connecting the ChromaSteamX Fixture to the ChromaSteamX Control Box

WARNING

- **Shock Hazard.** Ensure that power is turned off during installation. Turn off power at breaker panel.
- Shock Hazard. To prevent electric shock, do not remove the screws on the back of the control box. No user-serviceable parts inside. Refer servicing to qualified service personnel only.

At this point in the installation:

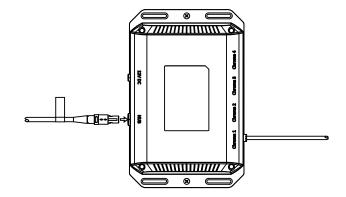

- Each of the LED cluster's pigtail has been connected to one end of the 30-foot LED power cable (see page 9), and the other end has been routed through conduit so that it is located for connection to the control box.
- Connect the free end of the LED power cable(s) to any of the ports labeled Chroma1 through Chroma4 (Figure 15)

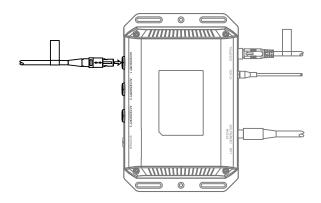

Connecting LED Power Cable Figure 15

Connecting the ChromaSteamX Control Box to iSteamX Hub

- **1.** Plug the accessory communication cable into the port labeled Hub on the LED controller. (**Figure 16**)
- **2.** Plug the FREE END of the accessory communication cable into any of the accessory ports on the iSteam Hub. (**Figure 17**)

Connecting LED Power Cable Figure 16

Connect LED Controller to iSteamX HUB Figure 17

Before specs, finish up installation

- **1.** Plug in the power supply provided with ChromaSteamX into the **(Figure 18)**
- ChromaSteamX control box port marked 12 VDC.
- **2.** Plug the power supply into a standard outlet.

_____ ChromaSteam®X

HOMEOWNRE/END-USER INSTRUCTIONS

About ChromaSteamX

Like water and heat, light is a fundamental life force and may improve your physical and mental state. The Mr.Steam ChromaSteam®X system integrates light with steam, creating chromatherapy environments rich with color, mood, and warmth:

- ChromaSteamX suffuses the steam shower with a spectrum of color from airy blue to sensual red.
- Vapor-sealed, low voltage LED module yield long-lasting high performance and cool operation.
- ChromaSteamX offers a wide range of 78,000 different colors.

ChromaSteamX Warranty

To view or download the **MrSteam® Accessory Warranty** and register your product, go to: **blog.mrsteam.com/wr**

Operating ChromaSteamX

You can control the ChromaSteamX LED module from within your steam room using the iSteamX control. Select from 78,000 different colors — and control the brightness of the light — all from a simple interface.

To operate the ChromaSteamX using iSteamX:

- **1.** Turn on iSteamX and wait for the iSteamX home screen to appear.
- **2.** Turn on the ChromaSteamX fixture (**Figure 21**) by tapping the **LIGHT BULB** icon (**A**) to enter the Chroma user interface.
- **3.** Tap anywhere on the color wheel or the on button, to turn ChromaX on.
- **4.** Tap anywhere in the color wheel (**A**) to choose the desired color. Slide the brightness control (**B**) left or right to choose the desired intensity of light.
- **5.** Turn on preset colors by tapping on any color in the preset list, scroll to find more colors.
- **6.** Turn off ChromaSteamX by tapping the off button.
- **7.** Exit the Chroma interface by tapping the X in the corner of the screen.

CAUTION

Note that ChromaSteamX is for mood lighting only, and does not substitute for general shower illumination.

NOTICE

ChromaSteamX only works with iSteamX.

IMPORTANT NOTE: For complete instructions on operating the iSteamX, refer to the iSteam technical manual (see www.mrsteam.com).
